The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

michael bartkowiak

Subject: Telecom Act Review

Dear Mr. Chairman,

Please help save my job. (sent from my personal email account)

I am an engineer working for a Telecom company (ALCATEL) here in Plano. And the "Baby Bells" and the like are major customers for us.

At one time SBC projected DSL rollouts would be a \$1 billion a year business for Alcatel - it isn't now.

The FCC is reviewing the 1996 Telecom Act for modification. I am sure there are several improvements that should be made, but the most important one to me is regarding the "unbundling" of broadband access. The current rules force network providers (builders) like SBC and Verizon to lease their broadband capabilities at State mandated wholesale rates to all comers for this sake of competition. The State mandated wholesale rates are at or below the actual cost for the services.

Imagine building a new apartment complex and the State housing authority imposing rent controls such that you were forced to allow any property management company that wanted to, to sublease any or all of your apartments for less than the rate you needed to pay your mortgage? Would you build any more apartments?

What if you had a competitor who was exempt from rent control? How long could you stay in the apartment business?

That is the state of broadband in America today with the cable companies offering broadband allowed to keep exclusive control of their broadband networks.

If SBC & Verizon, et al can't make a profit when they build broadband networks - they won't build broadband networks ... and I'll be out of a job soon, as well as more service provider employees like those at SBC.

Please allow the broadband network to be profitable for the companies making the capital expenditures and building the broadband infrastructure. Critics claim competition will be hurt and States want to maintain their strangle hold. But as implemented cable companies are rapidly expanding their monopoly and DSL deployments have been slowed. I have had to sign-up for Cable Modem access from AT&T. DSL isn't available in my part of town (Verizon or SBC) and there are no further deployments for Plano scheduled according both official and unofficial sources at SBC. There will only be competition in broadband if broadband is fully deployed and that will only happen if it is profitable. If you investing in build it you should be allowed adequate ROI to continue operate it and encourage you to build more.

Recognize that the broadband infrastructure, particularly for the "last mile" is slowly being built. And in most regions has NOT yet reached the critical mass to achieve the economic efficiencies of the long standing voice networks. SBC et al should be afford the same consideration COMCAST (AT&T) and COX cable are in deploying their broadband networks.

Changing the rules would save jobs, create more jobs, create real competition (DSL vs Cable), generate profits and all of these will generate more tax revenue at the state, local and federal level - without any significant spending!

I am also contacting Senators and Congressmen on this matter.

Thanks

Miguel Ylagan, CM
3801 Kite Meadow Drive
Plano, TX 75074

Character is very important
If you can't have it,
Be One!

BTW - rural broadband access. If SBC et al won't deploy in Dallas, TX because it loses money what chance do smaller communities have?

CC: Kathleen Abernathy, Michael Copps, KM KJMWEB, Commissioner Adelstein,
